Hortonworks Data Platform: Apache Ambari Release Notes

Copyright © 2012-2018 Hortonworks, Inc. All rights reserved.

The Hortonworks Data Platform, powered by Apache Hadoop, is a massively scalable and 100% open source platform for storing, processing and analyzing large volumes of data. It is designed to deal with data from many sources and formats in a very quick, easy and cost-effective manner. The Hortonworks Data Platform consists of the essential set of Apache Hadoop projects including MapReduce, Hadoop Distributed File System (HDFS), HCatalog, Pig, Hive, HBase, ZooKeeper and Ambari. Hortonworks is the major contributor of code and patches to many of these projects. These projects have been integrated and tested as part of the Hortonworks Data Platform release process and installation and configuration tools have also been included.

Unlike other providers of platforms built using Apache Hadoop, Hortonworks contributes 100% of our code back to the Apache Software Foundation. The Hortonworks Data Platform is Apache-licensed and completely open source. We sell only expert technical support, [training](#) and partner-enablement services. All of our technology is, and will remain free and open source. Please visit the [Hortonworks Data Platform](#) page for more information on Hortonworks technology. For more information on Hortonworks services, please visit either the [Support](#) or [Training](#) page. Feel free to [Contact Us](#) directly to discuss your specific needs.

RELEASE NOTES: Apache Ambari 2.6.2

The Ambari 2.6.2 Release Notes summarize and describe the following information released in Ambari 2.6.2:

- [New Features \[1\]](#)
- [Behavioral Changes \[1\]](#)
- [Patch Information \[1\]](#)
- [Common Vulnerabilities and Exposures \[2\]](#)
- [Known Issues \[2\]](#)
- [Fixed Issues \[3\]](#)

1.1. New Features

The Ambari 2.6.2 release includes the following new feature:

Table 1.1. Core Ambari

Feature	Description
Protect Zeppelin Notebook SSL credentials	Zeppelin Notebook keystore & truststore passwords now appear as 'password' fields in Ambari.
Set appropriate HTTP headers for using Cloud Object Stores with HDP	HTTP User Agent headers are now automatically set in HDFS configuration for Amazon and Azure Object Store access.

1.2. Behavioral Changes

Ambari 2.6.2 introduces the following change in behavior as compared to previous Ambari versions:

Table 1.2. Core Ambari

Description	Reference
Ambari 2.6.2 does not support IOP-HDP migration. Customers migrating from IOP should use Ambari 2.6.1 to migrate IOP to HDP 2.6.4, then upgrade Ambari to 2.6.2 and use it to upgrade HDP 2.6.4 to HDP 2.6.5.	IOP to HDP Migration

1.3. Patch Information

Ambari 2.6.2 is based on Apache Ambari 2.6.2.0. No patches have been applied.

1.4. Common Vulnerabilities and Exposures

Ambari 2.6.2.0 includes fixes for the following information-security **Common Vulnerabilities and Exposures (CVEs)**

Table 1.3. Ambari 2.6.2.0 CVEs

CVE #	Description	Mitigation
CVE-2018-8003	Ambari is susceptible to a directory traversal attack allowing an unauthenticated user to craft an HTTP request which provides read-only access to any file on the filesystem of the host the Ambari Server runs on that is accessible by the user the Ambari Server is running as. Direct network access to the Ambari Server is required to issue this request, and those Ambari Servers that are protected behind a firewall, or in a restricted network zone are at less risk of being affected by this issue.	Ambari 2.5.x and earlier installations should be upgraded to Ambari 2.6.2 Ambari 2.6.0 installations should be upgraded to Ambari 2.6.2 Ambari 2.6.1 installations should be upgraded to Ambari 2.6.2

1.5. Known Issues

Ambari 2.6.2 has the following known issues, scheduled for resolution in a future release. Also, refer to the [Ambari Troubleshooting Guide](#) for additional information.

Table 1.4. Ambari 2.6.2 Known Issues

Apache Jira	HWX Jira	Problem	Solution
AMBARI-24536	BUG-109839	When SPNEGO is enabled (`ambari-server setup-kerberos`), the SSO (`ambari-server setup-ss`) redirect no longer works.	No known workaround. Do not enable both kerberos and SSO using ambari-server setup.
AMBARI-23932	Bug-103818	Changes to the way metric aggregation operations were performed in Ambari 2.6.2.0 cause the average to be miscalculated in some situations. Some metrics averages will have lower than normal values causing Ambari Alerts to fire and metrics to be reported inaccurately.	Upgrade to Apache Ambari 2.6.2.2.
N/A	Bug-103704	Slider service check fails in kerberos environment when HDFS client is not present on the host where smoke test command is issued.	If slider service check fails on any host during express upgrade with task log showing error about kint command failing for hdfs command then move existing hdfs keytab from any other host to the host where slider service check failed.
N/A	Bug-93305	Oozie Spark workflows are failing with the following exception due to missing py4j and pyspark files after patch upgrade: <pre>Failing Oozie Launcher, Main class [org.apache.oozie.action.hadoop.SparkMain], main() threw exception, Missing py4j and/or pyspark zip files.</pre>	The workaround is to manually copy these files to HDFS. To do that follow the steps below: 1. On the Oozie server, using the HDFS client, find the new sharelib location for the patched Oozie: <pre># su - oozie \$ hdfs dfs -ls /user/oozie/share/lib</pre>

Apache Jira	HWX Jira	Problem	Solution
		Please add them to the lib folder or to the Spark sharelib. org.apache.oozie.action.hadoop.OozieActionConfiguratorException: Missing py4j and/or pyspark zip files. Please add them to the lib folder or to the Spark sharelib.	Found 2 items drwxr-xr-x - oozie hdfs 0 2017-12-14 16:45 /user/oozie/share/lib/lib_20171214164505 drwxr-xr-x - oozie hdfs 0 2017-12-18 18:56 /user/oozie/share/lib/lib_20171218185543 2. As the Oozie user, upload Spark files to the new location. <pre>\$ cd /usr/hdp/2.6.3.0-86/spark/lib \$ hdfs dfs -put datanucleus-*/user/oozie/share/lib/lib_20171218185543/spark \$ cd ../python/lib/ \$ hdfs dfs -put py*.zip /user/oozie/share/lib/lib_20171218185543/spark</pre>
N/A	Bug-93805	If any hosts with master components are in maintenance mode, patch upgrade cannot proceed even if these master components are unrelated to the patch upgrade.	Please take these hosts out of maintenance mode before proceeding.
N/A	Bug-92232	When patching HDFS using Express Upgrade, HBase may stop responding because HDFS is shut down completely.	You may Ignore and Proceed when the HBase Service Check is run and fails. Alternatively, you may pause the upgrade, restart HBase, then resume the upgrade.

1.6. Fixed Issues

The following table lists selected issues resolved in Ambari 2.6.2:

Version	Category	Apache Jira	HWX Jira	Summary	Components
2.6.2.0	Other	AMBARI-20908	BUG-94220	Kafka advertised.listeners replaced in Kerberos Mode	Ambari, Kafka
